

1. Write a python program to find largest number among three and four numbers.
2. Write a python program whether a number is positive negative or zero.
3. Write a python program to check whether a number is divisible by 11 or not.
4. Write a python program to check whether a number is even or odd using conditional statement and using for and while loop.
5. Write a python program to check whether a year is a leap year or not.
6. Write a python program to calculate profit or loss.
7. Write a python program to calculate grades of a student.
8. Write a python program to check whether a person is eligible for loan or not if he is having salary more than 50k and 3 years of experience.
9. Write a python program to find the area and volume of sphere.
10. Write a python program to display the data type.
11. Write a python program to demonstrate all operators –
 - a) Arithmetic Operators
 - b) Assignment Operators
 - c) Comparison Operators
 - d) Logical Operators
 - e) Bitwise Operators
 - f) Special Operators
12. Write a python program to swap two numbers.
13. Write a python program to calculate simple interest.
14. Write a python program to check whether a number is Armstrong or not.
15. Write a python program to calculate the sum of n natural numbers.
16. Write a python program to print the Fibonacci sequence.
17. Write a python program to check whether a number is prime or not.
18. Write a python program to calculate the sum of first 50 odd and even numbers.
19. Write a python program to find a factorial of a number.
20. Write a python program to count number of digits in given number.
21. Write a python program to find the sum of digits of a given number.
22. Write a python program to print a table of a number using for and while loop.
23. Write a python program to implement continue, break and pass statement
